

Discover Your Lowest Cost of Ownership

Discover[®] offers you an alternative solution to your stored energy needs that will help you save time and money in your every day equipment usage.

Discover[®] Dry Cell Semi Traction batteries are non-hazardous to the environment and are maintenance free, which allows you to virtually eliminate battery maintenance costs and avoid premature battery replacement. Whether you require increased life cycle and performance or a unique battery group size, Discover[®] EV Traction batteries are the right solution for your stored energy.

Discover Dry Cell Semi Traction Battery

- Longer run time and longer life than flooded batteries
- Higher conductivity with copper and stainless steel terminals
- Sealed technology helps avoid spill and corrosion
- Thicker plates protect batteries against deep discharge damage
- Higher charge retention rate of 97% to 99% per month

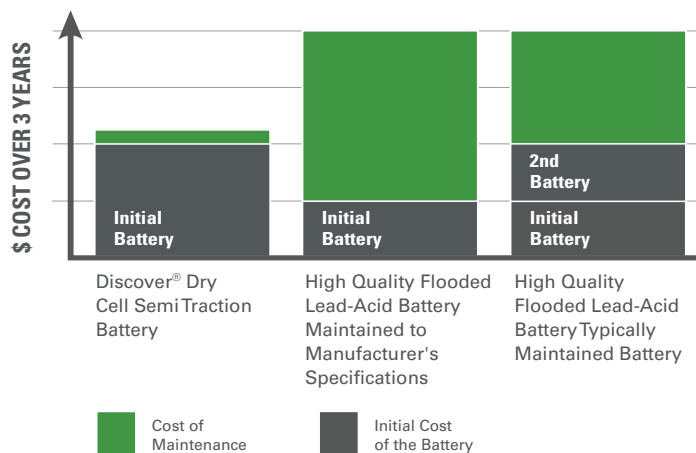

Environmental Benefits

- Classified as non-spillable and approved for transportation by air, surface and water
- Recommended as the battery of choice in environmentally regulated surroundings
- 99.9% gas recombination efficiency, no off-gassing
- 98% recyclable and made from recycled materials

Reduce your cost-to-own over the life of the battery

True cost of the battery, manufacturer's recommended maintenance schedule.
